

Tubular Pole

The Tubular Pole range with mounting heights of up to 15 meters, have been designed round pole to reduce shaft deflection –specially for the purpose to ensure least possible movement for highly accurate and clear vision required for all surveillance and security needs.

Applications:

- Freeway traffic monitoring
- Parking lot surveillance
- Facility perimeter security and lighting
- Prison yard observations
- Airports

Features:

- Stable structures to load equipments such as camera.
- Hot dip galvanized steel material providing durability, and can be powder coated or painted for an elegant outlook.
- Tilt-down operation can be done by one manpower, facilitating installation and maintenance work.
- Standard poles height range from 6mtr to 12mtr, and can be custom designed if project requires higher.
- Slip joint assembly required if higher than 11mtr.
- Providing all accessories such as cross arms, head frames or brackets.
